

S1U2 Installation Reference Guide

How to install S1U2 on terminal equipment.

Product Size/Weight

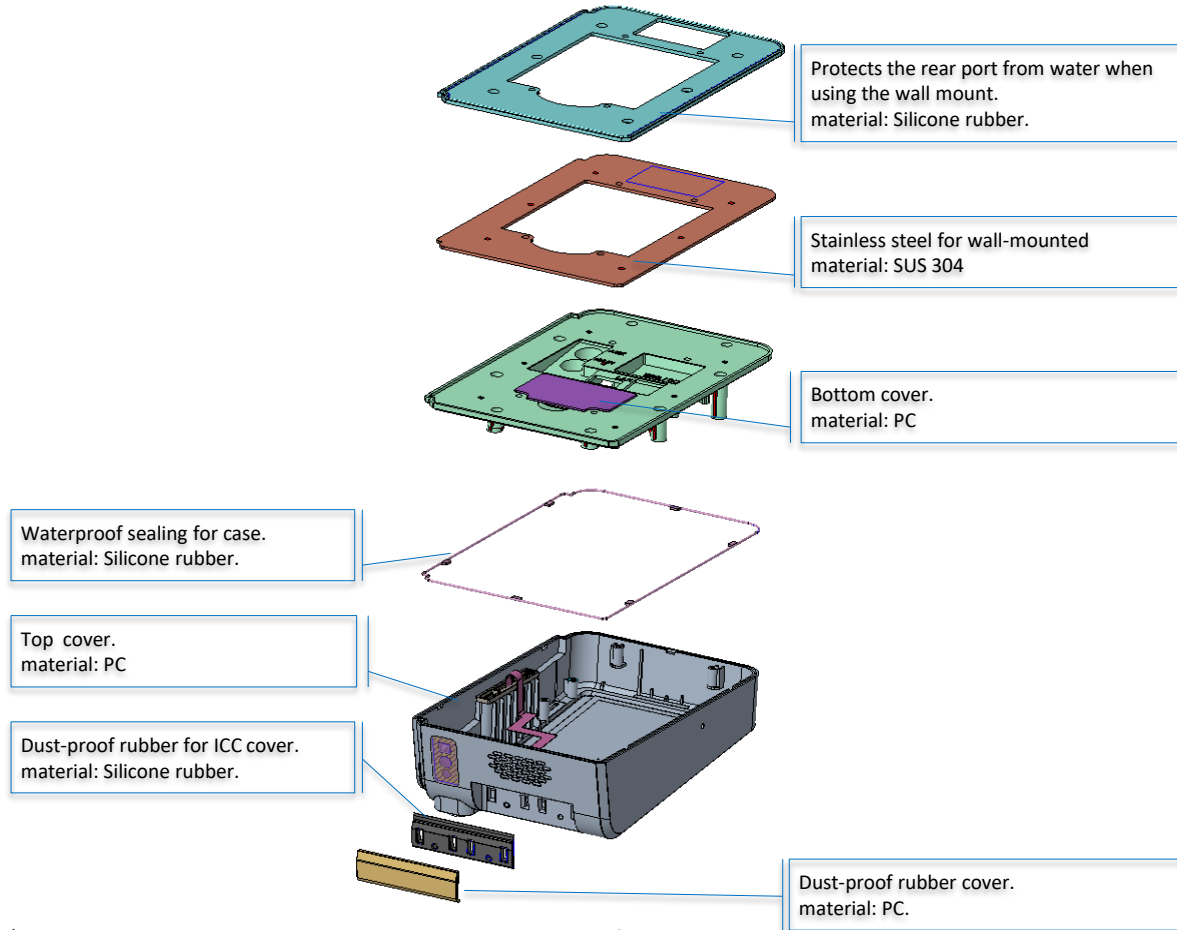

Product Waterproof and dustproof method

Waterproof Level:IP65

Product Waterproof and dustproof method

Waterproof installation of terminal equipment

- The green pad is made of silicon rubber. When mounted on the wall, make sure it is in close contact with the wall to prevent water from entering the unit.

The recommended installation angle is 20 degrees.

Terminal Interface

Easy Installation

- It is recommended to draw A, B, C, D. 4 screw holes on a piece of A4 paper.
- Paste the drawn A4 paper on the installation plane to prepare for drilling.
- This installation method does not need to comply with the EVA specification

Installation of Terminal equipment

It is recommended to use 4-M4 rivets (according to EVA & NAMA specifications)
